EDUCATION

Quantum University, Roorkee, Uttarakhand

2024 – Present

B.Tech in Computer Science & Engineering (AI & ML) · CGPA: 7.75 / 10

Hari Ram High School, Siwan, Bihar

2022

Class XII · 70.40%

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript

Web: HTML, CSS, React.js, Node.js, Express.js, REST APIs

Databases & Services: MySQL, PostgreSQL, Firebase, Supabase, Cloud Firestore

DSA: Arrays, Linked Lists, Trees, Graphs, Recursion, Backtracking, Dynamic Programming

Tools: Git, GitHub, OOP, Vite, Postman, NumPy, Pandas, Cloudinary

PROJECTS

QAttend Portal [GitHub](#) | [Live](#)

JavaScript, Firebase, Firebase Authentication, HTML, CSS, CloudFirestore

- **Role-Based Access Control (RBAC):** Built a web-based attendance management system with a three-tier access model - Admin, Teacher, and Class Representative (CR) - each governed by distinct, role-specific permissions.
- **Security & Authorization:** Enforced fine-grained Firestore security rules so Teachers can manage attendance only for their assigned sections and subjects, while CRs are restricted to a single assigned section - all enforced at the database level, not just the UI.
- **Real-Time Data Sync:** Integrated Firebase Authentication and Cloud Firestore to enable secure login, low-latency attendance updates, and real-time record synchronization across devices.

Qattend [GitHub](#) | [Live](#)

Node.js, Express.js, PostgreSQL, Firebase Authentication, Telegram Bot API

- **Automated Attendance Tracking:** Built a web-based attendance and assignment tracking platform integrated with the university's QUMS portal, enabling automated monitoring of student attendance and academic activities.
- **Real-Time Notifications:** Implemented automated Telegram notifications for attendance updates, backdated attendance changes, new assignments, and assignment deadlines.
- **Authentication & Data Management:** Integrated Firebase Authentication with Supabase PostgreSQL and implemented secure multi-user data isolation, QUMS session management, and automated attendance/assignment synchronization.

Winter Arc 2026 – Productivity & Habit Tracking Platform [GitHub](#) | [Live](#)

HTML, CSS, JavaScript, Firebase Authentication, Firebase Firestore, Firebase Hosting

- **Full-Stack Productivity Platform:** Developed a responsive Winter Arc Challenge web application enabling users to create accounts, track daily habits and goals, monitor progress, and maintain consistency through a personalized productivity dashboard.
- **Secure User Data & Authentication:** Implemented Firebase Authentication with user-specific Firestore data isolation, ensuring each user's Winter Arc progress and tracking data remains securely associated with their account.
- **Production Deployment & SEO:** Deployed the application on Firebase Hosting with responsive UI, SEO-friendly pages, sitemap and robots.txt configuration, Google Search Console integration, and Google AdSense monetization support.
-

E-Commerce Art Webpage [GitHub](#) | [Live](#)

React.js, Vite, Node.js, Express.js, PostgreSQL, Cloudinary, Razorpay

- **E-Commerce Art Gallery Platform:** Built a full-stack online art gallery enabling customers to explore artworks, view detailed descriptions and pricing, place orders, submit reviews, and connect with the artist through integrated social media channels.
- **Admin Artwork & Order Management:** Implemented a secure admin dashboard for managing artworks, categories, prices, descriptions, images, orders, reviews, customer requests, videos, and website settings.

- **Cloud-Based Media & Database Integration:** Integrated Cloudinary for optimized and permanent artwork image storage and Supabase PostgreSQL for reliable data management, with secure authentication, role-based admin access, and production deployment on Render.

CERTIFICATIONS & TRAINING

- Java EE Web Development — Udemy (2025)

ACHIEVEMENTS & PRACTICE

- **Problem Solving:** Solved **260+ LeetCode problems** across arrays, linked lists, recursion, trees, graphs, dynamic programming, and other DSA topics.
- **Programming & Development:** Practicing **Java, C++, Python, and C** while building and deploying real-world projects using Firebase, Node.js, Express.js, PostgreSQL, and REST APIs.
- **Project Development:** Built and deployed multiple applications including **QAttend, QAttend Portal, Arc-Challenge, and an E-Commerce Art Gallery**, covering authentication, databases, APIs, cloud services, and role-based access control.
- **GitHub:** Maintain public repositories for DSA solutions and development projects, demonstrating consistent coding and software-development practice.

ADDITIONAL INFORMATION

- **Languages:** English, Hindi
- **Interests:** Competitive programming, cricket
